

Led Lighting

Assembly Instructions (v.0808)

1. 1 Assembly

- Do the wiring first.
- Drill Ø 12mm holes (only applies if you do not have a SpaDealers Sauna Tub).
- Push the power cable out from the drilled hole approximately 15 cm.
- Push the light in place.

1.2 Connection

- The transformer shall be placed in a dry area (IP 20), no warmer than 40° C
- Place the transformer in a protective case if necessary.
- Connect the cables of the lights to the white coupling piece.
- Connect the transformer to the black coupling box
- Connect the black coupling box to mains (230 V)

1.3 Change of LED lights

- Pull out the LED light. Remove the contact from the white coupling's part and connect the new one.
- Install the light.

ATTENTION!

- **This product operates on direct voltage (12 V).**
- **The lights should not be connected without the accompanying connecting leads.**
- **Do not cut connecting lead shorter than 0.5 metres.**
- **The lead stands heat up to 120°C.**
- **The lead can be extended up to ten meters if you use a 1,5mm² lead.**
- **Contact your dealer or electrician if you are unsure about the assembly.**
